

2000 Plus™

2000P.V.™ Forced Air Dryer Plus Vac

CHALLENGAIR™ 2000PV™

- Excellent Animal Dryer • 2 Year Warranty
- Great Shop, General Purpose and Car Vac
- Powerful 24,000 RPM Twin Turbine Motor
- Uses Easy Fit Vacuum Bags

1. Quickly converts from powerful pet dryer to convenient shop vac or car vac! Simply remove the hose from the front to the back to switch from dryer to vacuum!

2. Includes 5 versatile attachments for any drying or vacuuming need - Comes with the unique "air sweep nozzle" for pushing water from the animal's coat when drying, and the "claw" attachment to vacuum a car just like the pros!

3. Less noise - Due to the polyethylene housing, the Challengair 2000PV is significantly quieter than dryers or vacuums with aluminum or metal housings. The dryer is also designed so the motor is acoustically isolated from the housing with "iso-dampeners" which are mounted between the motor and housing.

4. More durable - The housing is virtually indestructible and will not rust, dent or crack as metal housings can. It will retain its beauty much longer than metal dryers or vacuums.

5. Uses heavy-duty disposable vacuum bags - Replacement bags are available from Double K Industries or your Double K distributor in packages of 5.

6. Two year limited warranty.
