

560™

560™ Advanced Cage Dryer

CHALLENGAIR 560™

- The Most Advanced Cage Dryer • Controls Cage Temperature • 2 Year Warranty
- Maintenance Free Brushless Motor • Produces Air Volume of 750 CFM

The Challengair 560 Cage and Table Dryer features a "no maintenance" motor that requires no brush changes. Advanced technology helps protect animals from the risk of hyperthermia (overheating) or hypothermia (chilling). A thermal sensor located in the small well beneath the grate, is part of a control system that measures the temperature in the cage and prevents the cage temperature from exceeding approximately 107 degrees. With this control system, the Challengair 560 greatly reduces the risk of animal discomfort or harm. The Challengair 560 produces 70% more airflow than any other cage dryer— 750 cfm!

The Challengair 560 is the quietest cage dryer on the market and features a 60 minute safety timer and versatile settings including two air volume and heat adjustments. Air filtration on both air inlets helps keep fan and internal parts clean and the dryer fits most standard veterinary and grooming cages. The Challengair 560 has a two year warranty on parts and labor (excludes filters). Double K has service centers in most states. 30 day, money back satisfaction guarantee (excludes shipping charges).
