850 Portable Dryer

CHALLENGAIR 850 Portable Dryer™

- Powerful Air Flow - Up to 248 CFM • Twist On Nozzles - No More "Pop Off"
- Super Tough Cross Link Polyethylene Dryer Body • Sweeps Away Excess Water
- High Velocity Dryer • 2 Year Warranty

The Double K CHALLENGAIR™ 850™ High Velocity Dryer is the most effective and versatile dryer on the market. The CHALLENGAIR™ 850™ has no heating element due to the "flo-thru" motor configuration. The air is warmed by the operational heat of the motor, which saves electricity and produces heat up to 45 degrees above room temperature.

The high velocity air in concert with the "Air Sweep" nozzle will blow the water from the animals' coat and dry them faster. The CHALLENGAIR 850™ Animal Dryer offers great versatility using the assorted nozzles for the desired effect. The stand model can function as a conventional "Fluff" dryer, forced air dryer or cage dryer at the operator's discretion.

Standard Features

1. Twist-on hoses and nozzles included in two year warranty!!
2. Powerful air volume, up to 248 cfm
3. Sound damping foam lining reduces dryer noise.
4. Cross-link polyethylene dryer housing is easy to clean and virtually indestructible.
5. Easy to clean filters.
6. Two year limited warranty parts and labor.
